Low-maintenance facade

Benefit from durable, contemporary facade cladding that won't grey and requires no additional maintenance.

Your choice makes the difference

If you prefer a natural wood look for your facade, *Creative* profile is what you need. For a modern style, choose *Creative exclusive* profile. Available in three heights, the profiles can be installed flexibly in either horizontal or vertical orientation.

Looking great for years

Without the need for paint, stain or oil, your facade cladding will stay visually appealing for a long time. Resistant to moisture, UV radiation and dirt, it can be easily kept in top condition simply by cleaning it with water.

For new construction & refurbishment

The profiles are designed as a ventilated rainscreen cladding system and can be combined with thermal insulation, making them suitable for both new construction and refurbishment of existing buildings.

Durable & recyclable

Should you ever decide to replace your composite facade profiles, you can return them to us. We will recycle them into new, high-quality outdoor products – allowing you to actively contribute to sustainability with facades from NaturinForm.

No extra trees

For the production of our composite facade profiles, we only use PEFC-certified wood fibres from Germany sourced as by-products of industrial manufacturing processes. This means no extra trees need to be felled for your facade. Choosing this eco-friendly material means taking responsibility and protecting resources for generations to come.

Made in Germany
Produced in Upper Franconia

PEFC-certified
Sustainable wood composite
Made from residual wood fibres

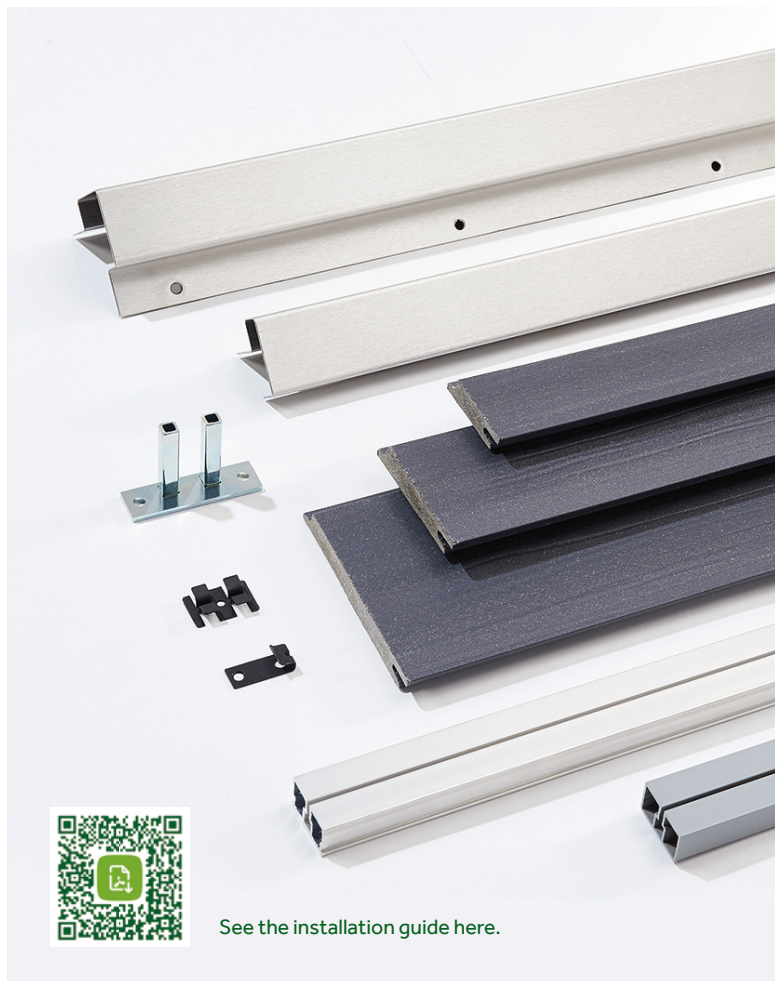

100 % recyclable
25+ years durability × 25 times recycled
= 625 years in the material cycle

Free return
100 % recyclable with our recycling box

Installation

See the installation guide here.

Simple & secure

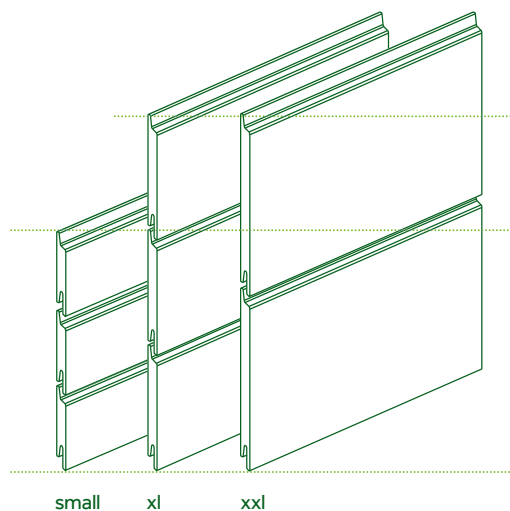

All composite facade profiles from NaturinForm can be installed quickly, easily and with concealed fixings using a classic timber substructure. The individual facade profiles interlock with the facade clips to provide a secure connection.

- Concealed installation
- Elegant corner design thanks to stainless steel profiles
- Ideal for bin enclosures, bike shelters, and more.
